ARTIFICIAL INTELLIGENCE KNOWLEDGE & AUTOMATION SYSTEM (AIKAS)

1. Purpose

To function as the Artificial Intelligence Knowledge & Automation System (AIKAS), storing prompt engineering, workflows, and automation logic based on capability rather than tool name.

2. System Definition

Artificial Intelligence Knowledge & Automation System (AIKAS)

3. Philosophy

Store the thinking process and workflow, not just the finished prompts. AI is an acceleration layer.

4. Scope

Prompt engineering, AI models, task libraries, workflows, agent systems, and automation.

5. Directory Architecture

- 01_PROMPT_ENGINEERING
- 02_AI_MODELS
- 03_TASK_LIBRARY
- 04_WORKFLOW
- 05_AGENT_SYSTEM
- 06_AUTOMATION

- 10_AUDIO_VIDEO_AI
- 11_RESEARCH_AI
- 12_BUSINESS_AI
- 13_EXPERIMENT
- 14_KNOWLEDGE_BASE

6. Core Components

Prompt Frameworks, Task Libraries, Agent Systems.

7. Workflow

Problem → Framework → Prompt → AI → Output → Review → Improve → Versioning → Knowledge Base

8. Metadata / Data Structure

Not specified in Paket_Lengkap.pdf.

9. Dashboard / Tracking

AI Dashboard.

10. Integration with Other TCOS Domains

Acts as an acceleration layer for all other TCOS domains.

11. Lifecycle

Problem → AI → Human Review → Knowledge Base

12. Operational Rules

Human review remains required. AI does not automatically become the Source of Truth.

13. Future Expansion

Not specified in Paket_Lengkap.pdf.

14. Source Reference

knowledge/Paket_Lengkap.pdf, Pages: 318-334

15. Status

CANONICAL KNOWLEDGE DRAFT

Source Traceability

Primary concepts extracted:

Extracted all directory architectures, system definitions, workflows, lifecycles, and metadata structures exactly as defined in the source document. Adapted strictly for the current repository.

No external sources used.
